THE LAND IS OUR FIELD

WELCOME

Welcome to our Winter edition of TAG Torque, you've survived the horrors of Halloween and the equally terrifying autumn weather. We promise you only treats (and no tricks) with our latest warming winter offers.

Stay dry with our promotions on waterproof clothing and footwear. If you're fed up of the rain, and would rather look back to sunnier days then why not check out 'Harvest Memories' Amy Bemand's winning entry into our Harvest Photo competition page 13.

Last month our sales team travelled to Valencia in the South East of Spain to find out more about the latest John Deere product launch, read about the new Super Compact 6M page 18, available to demonstrate from March onwards. It looks set to be a very popular range of tractors, so talk to your Area Sales Manager to book your demo today.

Mark Ricketts has added a new John Deere 9700i Forage harvester to his harvesting setup – outstanding performance in the field in Grass, Wholecrop and Maize whilst being friendly on the wallet with exceptional fuel efficiency page 3.

In related fuel efficiency news, find out how John Deere have extended their industry leading Fuel Guarantee scheme to 4 cylinder 6R tractors. If you're interested in saving fuel it, it doesn't stop here, on page 12 you can see how TAG's new machine reports can help you analyse your machines' performance and identify potential areas for reducing fuel consumption and saving on servicing costs.

With grain harvest now behind us, and foragers soon to be put away for the winter, have you thought about booking your machine in for an Ultimate 'Expert Check'? Available on Combines, Sprayers, SPFH, Balers and Mower Conditioners our trained technicians will check up to 260 points on your machine looking for any potential problems and then recommending any repairs required, ensuring maximum reliability for the year ahead. Book in with your local Service Manager today to take advantage of promotional workshop rates over the winter page 16.

Going into the winter is the perfect time to take a look at training of your team, do all of your operators have the right training to safely use, and get the most out of your machinery? As a LANTRA and UK Rural Skills approved training provider we can offer you a full range of operator training courses, to help you meet your H&S requirements page 4.

It's great to be on the winning team, and we're very proud to have had two teams make through to the final of the John Deere World Championship Golf tournament. The final was hosted over two days at the prestigious Gleneagles golf course resort, read the tournament report on page 20.

BIG CAPACITY FORAGER CUTS OPERATING COSTS

Offering an extensive agricultural contracting service throughout an area spreading from Cardiff to Tewkesbury, M G Ricketts has been in the business for almost 25 years and is renowned for quality of service. They specialise in all types of agricultural services including ploughing, drilling, muck and slurry spreading (umbilical), forestry management and forage harvesting - grass, whole crop and maize.

Business owner Mark Ricketts commented, "We like to keep our kit up-to-date with the latest tech and specifications because our reputation for reliability is what sells us. We run all John Deere tractors including two 6195Rs, a 6155R and a 6150R. This year, we have updated our self-propelled forage harvester from a Claas 970 to the very latest John Deere 9700i and it's proven to be a very positive step forward."

The John Deere 9700i self-propelled forage harvester is powered by a massive V12, 24.2 litre, 759 horsepower engine really delivers productivity in the field. High-capacity, ProStream crop flow system and proven kernel processor, maximise the horsepower by providing smooth and efficient material flow throughout the machine in all crops be it grass, whole-crop or maize silage.

"There were two things that made me change up to the John Deere," commented Mark, "firstly, the engine is absolutely amazing and doesn't die - just keeps on powering through. It's one of the best engines I have ever experienced. Secondly, the back-up service from Tallis Amos Group is phenomenal. When you are running a very busy contracting business like ours, you cannot afford to have anything but the best back-up. We've been dealing with Simon Amos at TAG since we started and

they have always given us excellent after-sales back-up, it's second to none."

John Deere 900 Series forage harvesters are well known for offering very consistent length of cut, something which discerning customers, looking to make the highest quality silage are always looking for. "Not only are we getting consistent length of chop, regardless of crop - which can help make the highest quality silage, but we also have the highest level of accuracy in the field as we are using John Deere's StarFire 6000 receiver integrated with AutoTrac giving a powerful precision farming solution. We are planning to add the HarvestLab facility in the near future, so we can provide our customers with real-time read-outs of crop yield and crop quality."

Typically, Mark and his team, with the John Deere 9700i are harvesting between 70 - 100 acres a day - depending on crop and field conditions. "Fuel consumption has been exceptional," added Mark, "likewise reliability. This means we have greater uptime, greater field performance and reduced fuel costs, all of which are a benefit to both ourselves and our customers. With TAG's exceptional back-up, we rarely lose time for servicing stops and if we do have a hold-up, TAG's service guys are there at a drop of a hat. I couldn't ask for a better combination. It's just a perfect set-up for me."

Mark Ricketts "We've been dealing with Tallis Amos since we started our business."

TAG TRAINING AND TESTING

MEETING YOUR COMPLIANCE NEEDS

We are pleased to be able to offer a comprehensive range of Operator Training Courses and Machinery Testing, helping you and your operators to stay safe and get the most out of your machinery.

We are approved to conduct NSTS Sprayer and Spreader Tests, Thorough Examination Tests and Tilly Pass Trailer Tests, we are also a LANTRA and UK Rural Skills Approved training provider meaning we can carry out testing and training on the following machinery:

- Forklifts
- Telehandlers
- Wheeled Loaders
- Tractors
- Commercial Mowers
- ATV & Utility Vehicles

With over 1000 courses available in areas from Machinery Operator Training to Health & Safety and everything inbetween, In association with UK Rural Skills & Lantra we aim to service all your training needs for a successful business. If you have particular training requirements which aren't listed here, please contact us and we'll help you out

BOOKING

To book any of our TAG Operator Training courses, to arrange Machinery Testing or if you would like further information please call Pete Gash our Customer Support and Training Manager on 0345 222 0456 opt 2. or email training@tallisamosgroup.co.uk

1000 HOURS & ONE CAREFUL OWNER

Huw and Sheila Llandre run a large sheep farm near Lampeter, with 550 ewes and 60 cattle.

Huw had always wanted to aspire to owning a John Deere tractor - and ten years ago while at the Royal Welsh Show, he came across the perfect model on the Tallis Amos stand - it was a John Deere 6330!

Although it might have been slight overkill for what he needed, for Huw, it was ideal for his sheep farming operation and fulfilled his personal goal.

Today, although his 6330 only has 1000 hours, it's still worth what he paid for it ten years ago - in fact, it might be worth a little more!

It just goes to show that if you invest in the best, it always pays off in the long run.

NOTHING RUNS LIKE A DEERE

T-SERIES

REMARKABLE COMBINE CHAMPION

We are so confident of the T-Series performance that we are challenging owners of equivalent combines to go header to header and beat the T-Series to win £10,000*.

S-SERIES

LESS THAN 1% BROKEN KERNELS

We believe the grain quality of the S700 is so good we guarantee you can achieve less than 1% broken grain. If not, we'll pay you the difference in cash for the lost grain*.

FINANCE OFFER 1 + 3 ANNUAL PAYMENTS

* For full terms and conditions or visit our combine. web page at deere.co.uk/BrokenGrainGuarantee. The finance offer is available for business users in the UK only, the offer is available until further notice. Finance is limited to 50% of retail value. Rates/payments may vary to reflect changes in tax and cost of funds. VAT where applicable. An administration fee will be charged. We may withdraw this offer at any time. Finance is subject to status. Terms & conditions apply

DIET FEEDER SERVICE

FROM £120*

Servicing of your diet feeders and wagons can help to reduce breakdowns and ensure maximum milk yield potential

Servicing includes:

- Main drive gearbox oil change/check
- Two-speed gearbox (where fitted) oil change/check
- Full greasing of all points including PTO shaft
- Check hydraulic system and performance test
- Check brake systems for performance, wear/adjustment
- Full testing of electronic weigh-cells and control boxes
- Tyre check for damage and correct inflation pressures
- Test and check conveyor and feeding system for accuracy
- Adjust chain and belt drives
- Check for absent blades, sharpness and damage

*Excludes VAT and replacement parts, Offer Expires 20/12/19

COMPETITION WINNER....

We recently held a competition for anyone who purchased a New or Used extended warranty package from Tallis Amos Group and took delivery of the machine between 1st August 2019 – 25th October 2019 to be entered into a draw to for a chance to win free Servicing for a year.

We are pleased to announce that the winner of this competition is Mr Jonathan Davies, Carmarthenshire and his New John Deere 5100R Tractor!

LEADING THE PACK WITH TIMBERWOLF

TIMBERWOLF®
Lead the Pack

On the 23rd October we had our first ever Timberwolf roadshow demonstration day in the woodlands of the fantastic Overbury estates. The TAG sales and service team were joined by the Timberwolf team to put the range of wood chippers through their paces. The weather was beautiful and lots of TAG customers came to see the UK's number one wood chipper brand in action.

There was a range of machines, including the mighty impressive TW 280TVGTR tracked machine with its 45HP engine and double sided blades which made mincemeat of some considerable tree trunks and with its 'Wolftrack' variable tracking system it could be

taken virtually anywhere within the woodland. One thing that impressed the TAG team was the performance of the smaller TW 230DHB road towable wood chipper. It weighs less than 750kg but can still cope with 6 1/3" trunks with ease thanks to its quad force rollers that exert 300kg of pressure onto the wood as it's drawn in to the double sided blades.

Timberwolf have a range of road towable, tracked, PTO and gravity wood chippers and also shredders. If you would like any information, or for a demonstration on site then please contact your local turf area sales manager who will be more than happy to help.

JOHN DEERE GATOR SERVICE ONLY £249!

LAST CHANCE!

ON ALL GATORS BOOKED IN FOR FULL ANNUAL SERVICING BEFORE 30TH NOVEMBER 2019

Our technicians are John Deere trained and have access to the latest factory information which helps them to detect any potential problems before they occur to guarantee the best performance from your equipment for many seasons to come.

FOCUS ON FUEL GUARANTEE

**NOW AVAILABLE ON
SELECTED 4 CYLINDER
TRACTORS**

Fuel represents a massive variable cost when it comes to running machinery, it's hardly surprising that it has become an area that manufacturers have focused on. A typical tractor will use a value of fuel that is between 1 ½ - 2 ½ times its initial purchase price, so small savings on fuel consumption per hour can soon add up.

The impressive progress that Deere engineers have made in the optimising fuel consumption in real world applications has meant that our customers are already benefiting from machines which used less fuel and deliver higher output than ever before.

Backed up by the industry leading fuel guarantee programme, Deere now guarantee the fuel consumption level for all 6 cylinder, and now selected 4 cylinder tractors in road and field work applications. The promise is simple; in the first year if your tractor uses more fuel than the published figure then Deere will compensate you with for the extra fuel used, customers coming in under the published figures are rewarded with a double efficiency bonus.

Springhill Farms are the latest customers to benefit from the Fuel Guarantee scheme. Farm Manager, Will Parrott of receiving a cheque for £1,454.33 for their 3 6250R's from Pete Gash, our Customer Support & Training Manager.

BIG SAVINGS WITH PERFORMANCE REPORTS

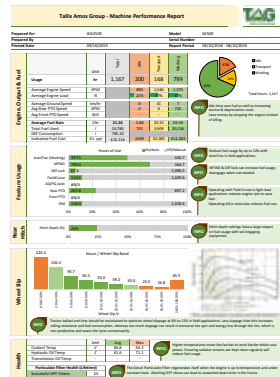

Tyre pressure, ballasting, maintenance, working depth and driving style all contribute to fuel consumption. To help identify potential savings, our Customer Support team have developed a TAG Exclusive machine performance report. With your consent, we can use JDLink data to compare the performance of machines in the field.

A snapshot for each machine shows details of usage and fuel consumption, time spent at idle, transport and in work, as well as feature utilisation such as AutoTrac, Field Cruise, Hitch depth and Wheel Slip.

Our machine report service includes an in-person review with a member of our Customer Support team, aimed at identifying areas where you could make savings. "With all of machine performance reviews I have done I can see significant differences between machines in similar applications" said Pete Gash, "We can help provide pointers to managers and operators, to improve performance, from optimising wheel slip to reducing wasted engine hours at idle"

Premium & Ultimate Support Package customers get this service free of charge once a year, outside of a support package it is currently available at a discounted rate of £75 per machine.

Why not contact Pete Gash our Customer Support and Training Manager on 0345 222 0456 (Option 2) to find out more about the TAG Machine Performance Report and book in your fleet for a review.

HARVEST PHOTO COMPETITION

Congratulations to our Harvest Photo competition winner Amy Bemand who won a £50 TAG Gift Voucher!

The story behind the photo:

"We were on our way home from a party and didn't realise their Daddy had changed fields to one on the way home. We whizzed up the stubble in the car to try and get a glimpse of him before they went to bed! Lovely Harvest memories"

Winner - Amy Bemand!

A DAY WITH...

Chris Bufton - Demonstration & AMS Specialist, Leominster Branch

Chris Bufton is one of the longest serving members of the TAG team, starting with Alexander & Duncan over 38 years ago as a service apprentice and working through the ranks within the workshop, moving into the role of AMS specialist for Precision Ag tech 10 years ago.

One of Chris' main responsibilities is to support the sales team by leading demonstrations of new equipment, we decided to follow him for a day in early October to see what the role involved.

"Today we're going to take a 6215R Tractor out on demonstration to a potential customer, he is currently running a JCB FastTrack, our job is to demonstrate the features which set the John Deere apart from the competition" say Chris.

"A good demonstration always starts with good preparation, you want to make sure that the tyre pressures and ballasting is right for the job in hand, and that the correct control boxes and hydraulic fittings are installed to connect to the customer's implement".

We make a phone call to the customer to arrange times and find out what he wanted to do with the tractor, in this case he wanted to try it on his 3m Flatlift cultivator in the morning and then a large tanker in the afternoon.

Before heading out we adjust the tyre pressures to suit the wet field conditions and set off with the Sales Rep to the customer. Once on farm Chris swings into action, starting off with a walk around of the tractor highlighting some of the key features and familiarising the customer with the machine. "I am always keen to get the customer into the seat as soon as possible, there are so many great points about a John Deere that I could go on for hours, but I think that it's best to let the customer experience this first hand".

Once the walk around is done Chris we get the cultivator hooked up and we head to the field. In the field Chris goes through the set up of the ITEC Hedland Management System, CommandPro joystick and explains how to adjust the transmission settings for the job in hand before activating AutoTrac guidance.

"I can still remember my first job as an apprentice was helping to fit a Duncan cab onto a 2130 John Deere"

"It's features such as ITEC and CommandPro which make the operator's life easier so I always set that up correctly, transmission settings have huge potential to save fuel so that's also important. I always save AutoTrac until last, customers never fail to be impressed, It really is the best system on the market"

After leaving the customer for a couple of hours on the Flatlift, we move it onto a tanker, doing a lot of road work I'm interested to see how the 6215R with its 50k transmission compares to the FastTrac's 60k.

On the road the 6215R pulled the tanker faster over a journey, effortlessly keeping to 50k whilst the FastTrac sometimes struggled to get to 50k, let alone 60k and the 6215R used less fuel for each journey.

"I never doubted it" said Chris smiling, "There will always be features which the competition have which we don't, but I'm confident in the strengths of our product and backup, that's why I wouldn't want to be demonstrating anything else".

After the demo Chris spent time reviewing the JDLink telematics data with the customer, this backed up how the machine had performed, and included details of fuel consumption allowing the customer to see the savings vs his current tractor. We then discussed John Deere's Fuel Guarantee scheme talked about some of the in house benefits which come from dealing with TAG, such as our Tractor FarmSight support packages, designed to help customers get the best out of their machines every day.

Leaving the customer and returning to Leominster Chris called the sales rep to update him on the demo. "I can't do anymore, it's over to you now to close the deal!"

**LAST

VALENCIA LAUNCH FOR UPDATED 6M TRACTORS

L-R Paul Morris, Pete Gash, Nathan Griffiths, Chris Bufton, Tom Folly, Trevor Bolton, Steve Moon, Simon Maund & Dylan Jones

In a welcome relief from the dreary autumn weather of early October fifteen members of the TAG sales team travelled to the port city of Valencia in the south east of Spain for the latest John Deere product launch.

The European wide launch saw several updates to Deere's product line up which are due to be introduced over the next 12 months.

As well as new products due to enter production in the coming year, the team were also shown sneak peaks of development projects, such as this electric driverless tracked concept tractor, with up to 680hp it's certainly one to watch for the future.

NEW 6M – MOST COMPACT EVER

The 6M series tractors have long been recognised as delivering high standards of comfort, performance, manoeuvrability and visibility. This combination is set to become with the most compact 6Ms ever.

Officially launching at Agritechnica in November, the 6M range has been expanded with four new super compact four-cylinder models from 90-120hp. Replacing the 6MC and 6RC the new 6Ms feature an aggressively sloping low bonnet, a slimmer steering cowl and a re-designed panorama roof giving an unrivalled view to the front of the machine. A 2.4m wheelbase delivers an impressive turning circle of just 4.35m, with a maximum payload of 4.7 tonnes making this an extremely capable tractor which looks set to become a new classic following in the footsteps of the 6020 and 6030 series.

Across the 6M range, now stretching from 90-195hp updates include the introduction of Intelligent Power Management giving up to 20hp power boost for demanding PTO and transport applications.

A newly designed cab can now be specified with a CommandArm and CommandQuad transmission giving maximum comfort and fully automatic clutch-less gear shifting.

Up to four mechanical or electronic SCVs are available and a programmable electro-hydraulic joystick helps to deliver outstanding productivity.

As you would expect a full range of AMS and FarmSight solutions are available including JDLink telematics and AutoTrac guidance ex-factory.

With orders of the new 6M due to start arriving later in 2020, we have some great offers on the last of the current 6M series tractors, please contact your sales representative for more details.

MAKING THE CUT!

John Deere 2019 World Championship

It's one thing to be invited for a competitive game of golf, but when your team comes second in the 2019 John Deere World Championship, you've got something to be proud of!

Some 35 teams of four players, from around the world participated in the 2019 John Deere World Championship, held at Gleaneagles - the first time that the tournament had been held outside of the USA. There were 140 participants, including 10 teams from the UK, two of which were staff & customers of the TAG who qualified via the South West Regional Tournament held at Saltford Golf Club, Bristol

Team 1: Finishing first in the qualifiers

Ben Tallis, Tallis Amos Group
Dale Housden, Drayton Park Golf Club
Dave Roberts, Saltford Golf Club
Steve Lloyd, The Worcestershire Golf Club

Team 2: Runners up in the qualifiers

Nick Apperley, Tallis Amos Group
Wayne Vincent, Cotswold Hills Golf Club
Jackson Merrick, Leominster Golf Club
Neil Smith, Kings Norton Golf Club

After success in the qualifying events teams were invited to a two-day final at the world-renowned Gleaneagles Golf Course, which this year celebrates it's Centenary.

On Day 1, the teams participated in 'Better Ball' Stableford – with the best two scores counting towards the team points for the day.

On Day 2, the teams participated in 'Texas Scramble' Golf which is where the entire team of four, tee off, then one of these drives is chosen to be used for the next shot and all members of the team place their balls where the chosen drive ended up, and all the team play a second shot from this spot.

From these second shots, one is chosen and all play a third shot for there – and so on until the ball is holed. Each team returns one score for each hole and the team with the lowest score for the round wins.

A customer team from Canada, won the top prize in the John Deere 2019 World Championship tournament, with a score of 142, and overall second with a score of 141 was the team from Tallis Amos Group, captained by Ben Tallis, joined by Dale Housden, Drayton Park Golf Club, Dave Roberts, Saltford Golf Club, Steve Lloyd, The Worcestershire Golf Club. In addition Steve Lloyd picked up the prize for longest drive on Day 1.

“For TAG to be the only dealer from the UK to have two teams qualify for the final is quite an achievement” commented Ben Tallis. “Both the Kings and PGA courses at Gleaneagles were fantastic, along with great hospitality from John Deere we all had an experience we'll never forget ”
