WARRANTY AND MAINTENANCE

# POWERGARD

## PROTECTION PLUS

PART OF JOHN DEERE'S FARMSIGHT STRATEGY

### **PowerGard Protection Plus, including Maintenance is the ultimate machine management programme for John Deere equipment.**

Comprehensive PowerGard Protection Plus, is an extended warranty and tailored maintenance plan for John Deere self-propelled machinery, which means you can budget precisely for the machine operating costs from day one of ownership, with no nasty surprises.

PowerGard Protection Plus applies to new John Deere equipment only and covers all main components through the life of the programme which can in most cases, be from two to five years.

When you come to sell your machine with an amount of PowerGard Protection Plus still available, the value of that machine will be significantly higher than a comparable unit without warranty. Selling a used machine with PowerGard Protection Plus warranty and a full-service history pays dividends.

Maintenance is monitored and scheduled by our John Deere trained and qualified service technician team who will carry out full servicing requirements to suit your schedule and workload. With a full, tailored maintenance plan, all oils, filters, fluids and consumables are included in the maintenance plan. All you need to do is provide the fuel and the driver.

## Typical examples of PowerGard
