For all finance enquiries, please contact your TAG Retail Finance Representative Nick Apperley  
phone 07508 076 998 email [nick.apperley@tallisamosgroup.co.uk](mailto:nick.apperley@tallisamosgroup.co.uk)

## WELCOME TO SENTINEL OCTOBER 17

Since the announcement that John Deere and Kramer, the German materials handling manufacturer, have joined forces, the move has further bolstered product backup. Kramer manufacture a wide range of compact wheel loaders, telescopic wheel loaders and tele-handlers, all of which are available through your local TAG branch. Kramer material handlers offer a full line-up of machines with a stacking capability of up to 8.75 metres with up to 5,500kg payload.

We've been looking for a high quality product in this sector for some time and feel that with John Deere's involvement, we have a serious product to offer the marketplace.

Full service and after-sales service back-up for the entire range, including previous Claas models are now supported by TAG - your official Kramer dealer throughout the West Midlands, South and West Wales.

We have demonstration machines available so contact your local TAG branch if you want to try one on your farm.

On page 9 we highlight some options for you to help protect your equipment. With thefts of Gators, agricultural and turf machinery increasing we have special offers on our range of security and tracking systems. ATVTrac and Cesar Datatag combined could also reduce your NFU insurance premiums by up to 25%

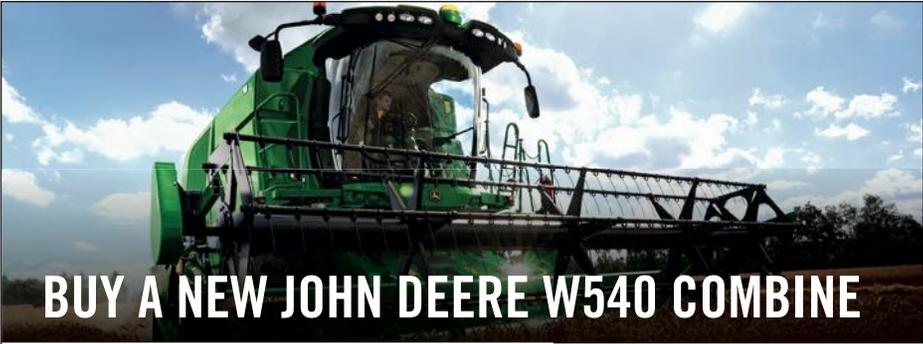

**A dedicated 3.2m wide Sports Turf and Golf Course mower for compact tractors.**  
**An accumulation of over 30 years of Trimax innovation, engineering and customer insight.**

## DOING IT RIGHT EVERY TIME

Local farmer and Entrepreneur, Denys Shortt OBE, knows a thing or two about quality and always doing it right. He is a very successful businessman, running the DCS Group on 25 acres near Banbury and, farms 170 acres near Broadway. His farming interests revolve around beef production from home-bred Belted Galloway's and he grows nectar crops for honey production.

"My needs are very specific," said Denys "I look after both sites and also buy all the equipment for them. I work on the farm one day per week and at weekends and I need to get jobs done quickly and with no breakdowns. John Deere equipment has been the answer to my prayers and it has been so reliable. I really have had almost no issues at all and the backup provided by Tallis Amos Group has been superb."

On the farm Denys uses a John Deere 6110R which has been their most recent purchase. It is partly used to carry big square bales to the cattle in winter over some very hilly ground and the tractor 'copes well with the slippery slopes.' It has also been useful for cultivating and seeding grass and, for their new honey business where they have planted 50 acres of Borage and Sainfoin for nectar - home to 2 million bees.

"Managing our grass is a challenge," added Denys "as we have around 10 acres of mowed area. We use a John Deere 1580 mower with a 62 inch deck for this - we like them so much that I have one at both Banbury and on the farm. I first spotted the 1580 being used by the councils and I realised how very robust it must be. One of mine is over

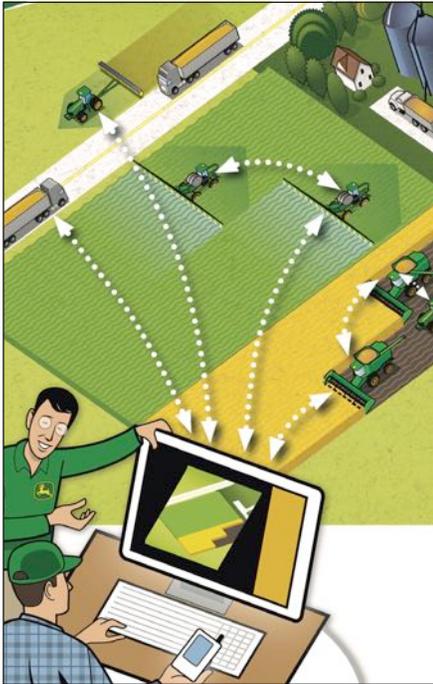

10 years old and it has had no issues at all. We have some very hilly ground and the 1580 can get everywhere and cuts some very rough grass - we use its 'four by four' capability regularly."

This year Denys purchased a John Deere 8800A mower. It has 5 individual cutting decks that create a wide 88 inch cut. "This does an amazing job," enthused Denys, "and has literally halved the time of our mowing - what was eight hours is now down to just four. The added bonus of this mower is that it has rollers and therefore creates stripes - something which makes the grass look amazing. For fun we tried the 8800 on our lawn - our garden lawn tractor used to take 40 minutes to do the lawn - the 8800 took under 5 minutes!"

There are over 10,000 trees on the Broadway farm and lots of maintenance to carry out. Denys has had a John Deere 855D Gator for over five years, uses a 4066R Compact tractor to help maintain the hedges and road edges and a Maschio Tigre flail for topping and to manage the rough areas.

"My experience with after-sales backup from the Tallis Amos Group has been excellent," commented Denys "they are always there when needed. I have had such great help from their sales representative Richard Ainslie who knows exactly what we need to get the job done.

Someone once said to me 'The art of managing land is having the right kit' - I could not agree more but I would add, the right kit is John Deere kit!"

## JDLINK - EXTEND YOUR SUBSCRIPTION FOR FREE\*

You can now experience the benefits of JDLink for free - When combined with a Support Package from the Tallis Amos Group you can take advantage of;

Improved machine uptime and performance through pro-active connected support.

- Remote machine monitoring & remote diagnostics to allow proactive support.

## 7310R DEMONSTRATES OUTSTANDING FUEL EFFICIENCY

After using a Fendt 930 tractor for eighteen months on 550 acres of arable and potato land at Hynett Farm, Bartestree, GJ Gibbs have changed out the Fendt, trading it in for a John Deere 7310R Tractor. Operator Melvyn Thomas said, “We wanted a change and Tom Folley from Tallis Amos Group gave us a demonstration of the John Deere 7310R on the farm and it performed amazingly well. One of the biggest and immediate differences out of many, comparing the John Deere to the Fendt was the incredible amount of fuel savings.”

Using an identical implement on both tractors, a 3.6m George Moate Tillerstar - a bed tiller and de-stoner, Melvyn found that the John Deere was doing the same work, faster and, “it was saving more than ten litres of fuel per hour.” enthused Melvyn. “That’s a big saving over the season! It’s also very quiet compared to the old tractor, the cab is operator friendly and very comfortable. I’ve also found the back-up we get from the boys at Tallis Amos Group is second to none. They bend-over backwards to help out with anything I need.”

Since November 2016, new owners of John Deere 7310R tractors have been eligible to participate in a programme that rewards customers financially for fuel-efficient driving on the road.

The Fuel Guarantee Programme is designed to offer a special incentive to customers for limiting or even reducing the fuel consumption of their tractor in transport mode. The fuel incentive has now just been extended to include John Deere’s 6R, 7R and 8R Series tractors.

Once the customer signs up to the programme, he and his supplying dealer will use JDLink to record the tractor’s actual fuel consumption in transport mode during the first full year of ownership. If the total fuel consumption has exceeded the John Deere target level, customers will be refunded by the company.

If the tractor consumes less than the targeted amount, owners of more efficient machines will still be rewarded, as they will be reimbursed twice the price per litre saved. Depending on the amount of transport work carried out through the year, this could mean a cash refund worth up to four figures.

John Deere takes its responsibility to the environment very seriously. Combined with the lower fuel consumption of 6R, 7R and 8R Series tractors, the new Fuel Guarantee Programme is aiming to make a significant contribution to reducing emissions – which is good news for the environment and good for your pocket!

# GUARANTEED FUEL ECONOMY OR YOUR MONEY BACK\*

## FUEL GUARANTEE

Use more than our target fuel consumption and we'll refund the difference.

## EFFICIENCY BONUS

Use less than our target fuel consumption and we'll pay you a bonus of 2x the difference.

## 6R (6CYLINDER), 7R, 8R TRACTORS

Fuel guarantee programme is available on 6R (6cyl), 7R and 8R Series tractors in transport applications.

JOHN DEERE

**THE FUEL GUARANTEE PROGRAMME.  
DO MORE. GUARANTEED.**

NOTHING RUNS LIKE A DEERE

# NO FOOD - NO MILK!

## GET YOUR DIET FEEDERS SERVICED FROM JUST £110.00\* + VAT LABOUR ONLY (PARTS EXTRA)

(Offer cut-off date 30th November 2017)

Out-of-season servicing of vital equipment such as diet feeders and feeder wagons minimises breakdowns and ensures maximum milk yield potential

### In-depth servicing schedules include:
