JOHN DEERE

Above map shows the current extent of the TAG RTK network, using the three RTK Base Stations sited at Leominster, Dursley and Blockley. The green rings show the 40 Kilometer radius of RTK signal coverage. The correction signal is picked up by a sim card in the machine-mounted RTK modem providing repeatable accuracy.

GREENSTAR

PRECISION FARMING SUPPORT

John Deere FarmSight integrates wireless communications and advanced precision farming technology to connect equipment, owners, operators and dealers to provide new levels of productivity and sustainable farm management.

GREENSTAR

PRECISION FARMING SUPPORT

PART OF JOHN DEERE'S FARMSIGHT STRATEGY

FarmSight from TAG, is an integrated support programme, managed through an individual menu that can include technologies such as GreenStar, JD Link, PowerGard, Machine Optimisation, Precision Farming, RTK and Maintenance, depending on the needs of your business. Getting the best from your advanced John Deere technology requires thorough operator knowledge, training and real-time support. Linking field and machine data to the office portal enables benefits such as effective decision-making by management, real-time feedback of machine performance, servicing interval monitoring and accurate crop analysis, to name but a few.

GreenStar Precision Farming

Within the range of GreenStar products, a tailored support package can help your business extract usable field data, construct reports, monitor machine settings, create interactive management records and analyse historical crop data. This provides access to an intelligent crop husbandry management process that enhances future planning and decision-making.

GreenStar - Precision Farming support packages are available in two levels, Standard and Premium. The Standard package is provided free-of charge, inclusive, with the purchase of any GreenStar Precision Farming system for the first 12 months of use. Choose the package that suits your farming operation.

STANDARD

- Unlimited telephone and email support (within reasonable working hours)
- One on-site visit per year (minimum 3 hours Technician attendance)
- All other visits or support charged at prevailing retail rate

ANNUAL COST **£300**

PREMIUM

- Unlimited telephone and email support (within reasonable working hours)
- On-site visits as required (minimum 3 hours Technician attendance)
- Software updates where relevant*
- Back-up data and data transfer
- Set-up documentation
- Refresher training*
- AMS component diagnostics

ANNUAL COST **£600**

Please note* refresher/training/software updates may be effected at either customer address/premises or during dealer training days at dealer premises.

As a valued customer you do of course have the choice not to take one of these designated packages. Instead, where ad-hoc GreenStar support charges are required outside of the Standard and Premium packages, services are based on the prevailing retail charge-out rate, plus any out-of-hours call-out charge. Where Mobile-RTK support is required, separate charges will apply. Please ask for details.

The above packages and costings are available for the period 1st January - 30th December 2015 (current ad-hoc charge-out rates are £72/hr and training programmes are based on £100/day) and are subject to change according to product and service supply variations from the manufacturer.

Other packages covering JD Link, PowerGard, RTK, Maintenance and Machine Optimisation are available under the FarmSight umbrella.
